MESKER BROS IRON WORKS

FOURTEENTH EDITION.

1898

G. B. SMITH. **SMITH'S BAKERY AND CANDY KITCHEN,** J. J. SMITH.

SMITH BLOCK.

MESKER & BRO. *Wappinger's Falls, N. Y., Dec. 28, 1895.*

Gentlemen: Our New Block, now finished, is the pride of the town; we found no trouble to put up the work. The Steel Columns and Galvanized Iron Work present a solid and artistic looking front. The imitation of large Stone Blocks on the Main Street side is immense, and finished as we have it, looks just like real Blocks of Brown Stone. The first of the three Fronts (the one to left of cut) we purchased of you three years ago, looks as well and is as sound as the day we put it up, and, all things considered, we are well satisfied that we used your Galvanized Iron and Steel Fronts in preference to any other, or any thing else, being considerably cheaper than the plainest building of brick or stone. Wishing you every success, we are

Truly yours, (SIGNED.) *SMITH BROS.*

421 to 441 S. SIXTH ST.

ST. LOUIS MO. U.S.A.

MANUFACTURERS OF COMPLETE HOUSE FRONTS.

SEND FOR DISCOUNTS.

Galvanized Iron Fronts, as manufactured by us, are no longer an experiment; their reputation is firmly established.

Wherever they have been introduced, their merits are so prominent and manifold, that they have taken prominent rank among Modern House Fronts, especially as their comparatively low price brings them within the reach of every one contemplating building.

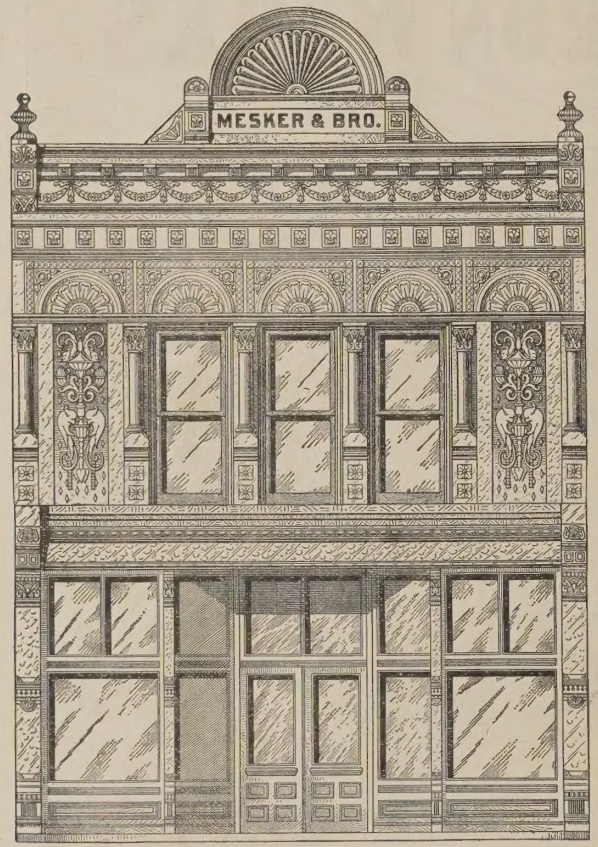
No. 501.

20 feet wide. Price $163.00.
25 feet wide. Price $180.00.
30 feet wide. Price $205.00.

Parties desiring prices on Special Designs or Arrangements, will please send us plans and specifications, which will be returned same day of receipt, by express.

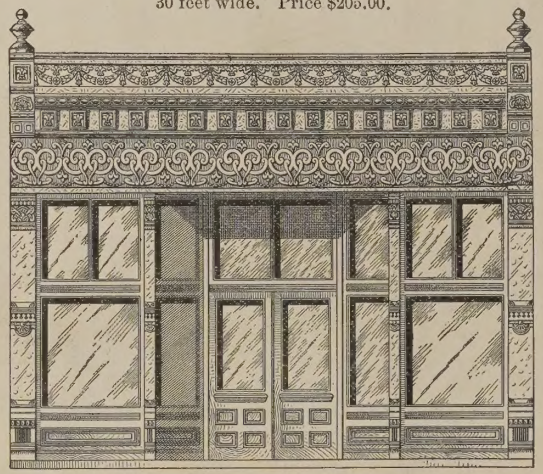
All Fronts illustrated in this catalogue can be changed to suit any height or width of building.

Our Designs can be furnished at least 20 per cent. cheaper than Special Designs.



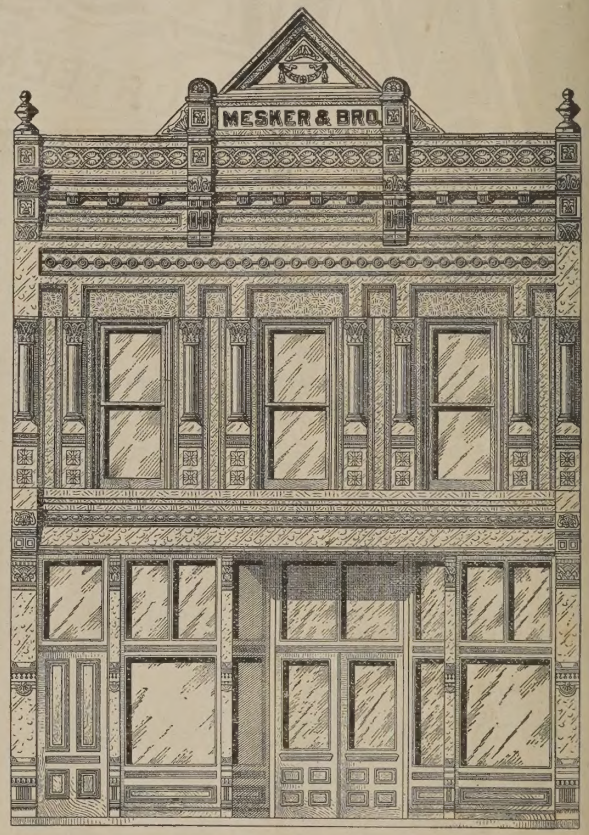
No. 500.

25 feet wide. Price $331.00.



No. 502.

25 feet wide. Price $207.00.



No. 503.

25 feet wide. Price $347.00.

Above Fronts consist of the following articles: Cast Iron Sill Course; Steel Columns; all Show Sash, Transoms, Doors, Store Door Posts, Transom Bars, and Second Story Sash and Frames, of White Pine Lumber; all Glass of Double Strength; and Galvanized Iron Work above First Story Columns. One Wood Look-Out shipped with every eight-foot section of Cornice for fastening Iron Work.

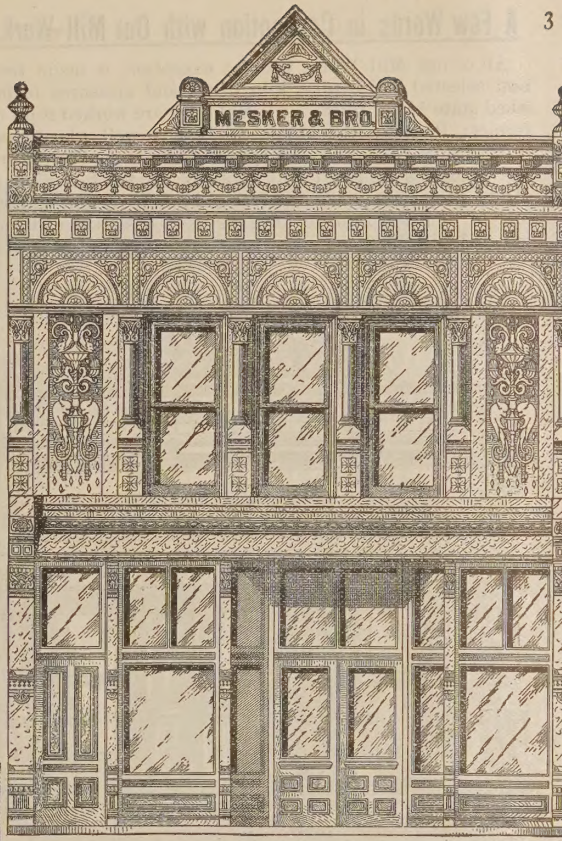
30 feet wide. Price $223.00.



No. 507.

25 feet wide. Price $342.00.

DIRECTIONS FOR ORDERING
GALVANIZED IRON FRONTS.

Send sketch of ground plan as shown above, giving as near as possible width and location of Columns, Doors and Show Windows; also distance between partitions if any.

Give correct measurement of width of building, from out to out; height of stories in the clear; also height between Ceiling and Roof; figure Joists in second floor, ceiling and roof, and prove these figures when added, with total height of building from Sill Course to Roof. If party walls are used show same.

We contract to furnish Fronts complete, as shown in the several illustrations, **excluding** Hardware, Sash Weights and Cords, Inside Casings, Wood Backing and Wood Lintel, which material is provided by the owner or contractor of building.

Our Fronts are susceptible to a high class of artistic finish in imitation of cut stone by proper application of paint and sand.

A Few Words in Connection with Our Mill Work.

All of our Mill Work, without exception, is made from best selected white pine, kiln dried, and measures in finished state 1¾ in. thick. All Moldings are worked solid on frames; Panels are all raised; Tenons well glued, and Second Story Sash pinned and glued; Show Sash, Store Doors and Transoms are fitted with loose beads for fastening in glass—proper play is allowed for glass. We claim, without fear of contradiction, to have the best designed and constructed Mill Work that can be used for store front purposes.

SEND FOR DISCOUNTS.

This sheet represents three of our original and handsome House Fronts, and gives a fair idea of their bold and artistic appearance; also shows how Designs can be made to suit the varied requirements of number of stories, heights of stores, side entrance and without same, interchange of round and taper columns, also number and arrangement of windows.

Send sketch, state your requirements, and we will promptly submit drawings and net prices.

The superior advantages of Galvanized Iron House Fronts, as manufactured by us, over all other House Fronts, has enabled us to successfully introduce them into every State and Territory. Their reputation for economy in price, elegance of appearance and durability is fully established.

We have manufactured over four thousand Fronts, from two to five stories in height, many of very elaborate and ornamental design. The first Galvanized Iron Front was erected by us twenty-seven years ago, which has required no repairs to the present date, *and gives thorough satisfaction.*

The above cut is an exact reproduction of a photograph of one of our 8 foot Sections of Ornamental Work, the picture being taken from an unpainted sheet of Galvanized Iron as it leaves the hands of our workmen, and will give a good idea of the beauty and symmetrical forms of our ornamentation.

No Iron Work — Lower Story.

No. 769.

22 feet wide. Price $172.00.
25 feet wide. Price $195.00.

Siloam Springs, Ark., Feb. 18, 1895.

Messrs. Mesker & Bro., St. Louis, Mo.

Gentlemen:—Siloam has just had the greatest fire in her history. Several brick buildings across the street from ours burned to the ground last eve, and our front, with the exception of the glass and wood work, is in just as good condition as ever. The glass was cracked and broken by the intense heat, and is a total loss, and the wood work of the show sash was badly charred, but the galvanized iron work is in splendid shape. What can you furnish new glass for? Answer immediately. Yours truly,

(Signed) E. C. BARTELL & SON.

The Fourteenth and latest Edition of our Illustrated Catalogue is presented to the building public, with new and modern designs of House Fronts, and supersedes all former issues. In this catalogue we have submitted modern designs, in which we have embodied all practical improvements, with the special object in view of adding to the former commendable qualities of our House Fronts, at the same time reducing their cost considerably, and feel confident that a careful perusal of our catalogue by Architects, Contractors, and Parties contemplating the construction or remodeling of buildings will be of invaluable service to them in perfecting and cheapening their designs, thereby combining durability and elegance of appearance with economy in price. Our Fronts are distributed throughout the country, and if parties contemplating building desire to ascertain the special merits of our Fronts, they can write our customers in their vicinity (addresses of which we will furnish), from whom they can obtain the required information, and we are beforehand convinced that it will, in every instance, be highly commending our work.

The continued increase of our trade has compelled us to increase our capacity correspondingly. We have added largely to our buildings, occupying at present 110,000 square feet of floor space. Our works are provided with steam power of ample capacity throughout, and equipped with the most modern and powerful machinery for every portion of the work; not only have we adopted for the purpose the most serviceable inventions of modern times, but wherever these have fallen short to meet the requirements of our specialties, we have had, regardless of expense, machines constructed to effectually answer our purposes, and provided as we are with every possible labor-saving device suggested by ingenuity and the requirements of our trade, we are enabled to produce our work of quality and with promptness equalled by none. With increased facilities, a large and complete stock of all materials and ornaments pertaining to our productions and specialties on hand, we can safely enter upon the present season with the full assurance and promise to our customers that their orders, however large, will be filled with the same accuracy and promptness for which we have established such firm reputation and which to maintain shall as heretofore be our principal aim and consideration.

We have unexcelled facilities for the manufacture of all kinds of Wrought Iron Work of every class, and will be pleased at any time to give estimates on any Special Work. When making enquiries, quote number of Design; if Special Work, send in drawings, and we will promptly return same with estimate.

NOTE.—We are also the largest manufacturers of Architectural Sheet Metal Work in the country, and will be pleased to quote on any such work for large Buildings, Courthouses, Schools, Etc

The increased demand for our complete Modern House Fronts, and their general introduction throughout the country, fully demonstrates their true merits and commendable qualities. Our construction, as well as our columns, are fully protected by letters of patents, as to secure to us exclusively the right to produce our Modern House Fronts, brought to their present state of perfection by years of experiments and large expenditures; and while others may try to produce imitations of our Modern House Fronts, none can approach us in point of architectural beauty, expediency and perfection of construction or durability; and as to price, our facilities for manufacturing, the low rates of freight due to our patent construction and close nesting and packing in consequence, and the purchase of all materials pertaining to our complete House Fronts in large quantities and for cash, enable us to distance all competition. Our designs are all original; we adopt modern ideas as soon as presented and where practical. We personally supervise every distinct branch of our business, and devote our undivided attention to same. Every department is in charge of a competent superintendent, especially selected and fit for that particular branch. It is our aim to have our complete House Fronts introduced into every town and city in the United States and Territories, and to that effect solicit the correspondence of owners, contractors and builders, assuring them prompt attention and faithful and careful execution of any and all orders entrusted to our care.

Burlington, Kans., March 16, 1893.

Messrs. Mesker & Bro., St. Louis, Mo.

Gentlemen:—More than eight years ago you made for us a Galvanized Iron Front, three stories high, and we will say right here that we put it all up in less than two days with inexperienced hands who never saw a Galvanized Iron Front before; all we went by was the drawing and instructions that you furnished. We gave it two good coats of paint, and it stands as good to-day as when it was first set up; and we therefore recommend your fronts to any one contemplating building, for there is nothing that can compare with them. Wishing you continued success, we remain, Yours truly,

(Signed) R. WINGREN.

KELL & GIBBS,
DEALERS IN
Grain, Live Stock and Implements.

USE ROBINSON'S CIPHER

Clifton, Texas. Feb. 3rd, '98

Messrs. Mesker Bro's.,
St.Louis, Mo.

Dear Sirs;--

Please send us at once the following glass:---
One piece 34 by 80 inches, Plate,
One piece 24 by 80 inches, D.S.A.
Two pieces 24 by 26 inches, D.S.A.
Two pieces 26 by 34 inches, D.S.A.

We had a fire in our town and the above glass were destroyed from the front we bought of you last. The fire originated in a wooden building just eight inches from our new store building and while the wooden structure was completely destroyed, our Mesker front was damaged but very slightly, the greatest damage being the breaking of the six glass. It has greatly advertised your fronts, as every one who witnessed the fire predicted that the front would be totally destroyed.

Under the circumstances, we will appreciate your closest price on the lights ordered, and will thank you to forward promptly.

Yours Truly,

Kell & Gibbs

This Page Illustrates Three Fronts, the Buildings of which are Frame.

Having had so many enquiries in the past, asking us if our Fronts can be used on a frame building, we have in this issue of our catalogue devoted a special page illustrating same, and at the same time state that *all* of our Fronts are applicable to any building (either new or old), of any material or any construction, with flat, low or high-pitched roof, any width or height. In many cases customers prefer, in corner Fronts as shown on page 28, to have lower story on sides brick and upper stories frame, with our Galvanized Iron Finish. This makes a fine building; in fact makes side look equal to front at a less cost than common brick work. For old frame buildings, the outsides of which are in a dilapidated state while the inside is in a fair condition, the substitution of one of our Fronts, and covering the sides with galvanized sheet steel, rock face stone or brick siding, will make a building of handsome appearance at a very small cost. Send us sketch of your old or new building, with your selection of any design shown in this catalogue; we will at once submit drawing, free of cost, with net prices and items of work estimated on.

No Iron Work — **No. 781.** — Lower Story.

22 feet wide. Price $188.00.
25 feet wide. Price $205.00.
30 feet wide. Price $218.00.

Fronts marked "No Iron Work in Lower Story" have no first story Columns or Cast Iron Sill Course figured in the prices quoted throughout this Catalogue.

Evansville, Ind., April 13, 1895.

Messrs. Mesker & Bro., St. Louis, Mo.

Gentlemen:—The Galvanized Iron Front you put up for me about 28 years ago is as good to-day as ever, and has cost nothing for repairs since its completion. Of course it has been painted and sanded, which gives it the appearance of richly cut and carved stone-work. You probably remember it is three stories in height, and is altogether an attractive front, comparing favorably with buildings of recent erection. Respectfully yours,

(Signed) CHARLES VIEHLE.

ROCK FACE STONE AND BRICK SIDING.

Made of Sheet Steel, Painted or Galvanized.

Perfectly imitates Rock Face Stone and Brick and is the most attractive Metal Siding ever offered to the trade. It is easily and quickly applied by any good mechanic, without using special tools, directly to studding or over sheathing; lays perfectly smooth and where an ELEGANT and ARTISTIC appearance is wanted it is rapidly taking the place of Corrugated Iron and other styles of Metal Siding and proving entirely satisfactory. It is suitable for siding purposes on Dwellings, School Houses, Business Blocks, Court Houses, Auditoriums, etc., costing no more than the best wood siding and about one-fifth that of brick. In point of appearance, durability, cheapness, and as a protection against fire, we claim it has no equal. We stamp our siding, using the best soft steel, thereby obtaining clear and sharp impressions, both sides painted but not striped.

Always lay with concave or hollow part of mortar line on outside.

Our patent Steel Columns for Brick and Galvanized Sheet Steel Fronts, as illustrated on this page, are made of the best plate steel, formed from one continuous sheet into the various shapes as shown by plans, and have been practically and thoroughly tested as to strength on Washington University (St. Louis) testing machine, by Prof. Calvin M. Woodward. Their superiority over Cast Iron Columns consists of the following advantages: One-half the weight of Cast Iron, making them easier to handle on a building; one-half the cost in freight; no blow holes, rough or uneven surfaces, or hidden defects; no breakage in transit or from accident on building. In addition to all of these points in favor of our Steel Columns, they cost considerably less than Cast Iron, are nicely finished and ornamented and the carrying capacity is greater and more reliable. All intermediate, six inch face, Box Columns are provided with 2 inch wood backing for securing of inside finish. Angle Columns for end walls, and Box Columns for partition walls, are provided with wrought iron stays at back, to permit anchoring to walls. Above we give a table of SAFE carrying loads, in tons, for Steel Columns as tested and calculated by Prof. Calvin. M. Woodward.

DIRECTIONS FOR ORDERING.

In ordering Cornices, always give total length from out to out. Cornices have no covering on top, they are to be covered with same material as roof. We furnish covering for Lintel Cornices, when ordered, at 15 cents per foot extra. Our Cornices are thoroughly fireproof. The brackets and modillions are bolted to the Cornice, and the mouldings are run through solid. Our Cornices are fully complete, including wood lookouts for joints every eight feet apart, and are so constructed that they can be put up by any mechanic without difficulty. The cost of putting up our Cornices, owing to their simple construction, is a mere trifle.

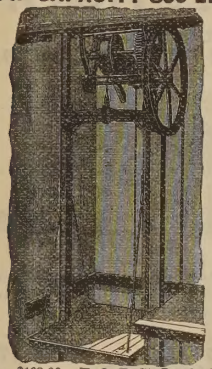
MESKER AND BROTHER
HAND POWER FREIGHT ELEVATORS.

No. 1. CAPACITY 800 LBS.



Price $108.00. F. O. B. St. Louis, Mo.
Extra for each extra foot rise of Car, 60c.

Price includes Winding Machine with Automatic Clutch; Car, any size up to 4 ft. square; Counter-Weight, Counter-Weight Sheave, with Shaft and two Bearings; 35 ft. best half-inch Wire Cable; 70 ft. Manilla Hand-Rope, 1 in. diam.; 60 ft. Hardwood Guides; two Wire-Rope Clamps; also Safety Attachment on Car.

No. 3½. CAPACITY 1,500 LBS.

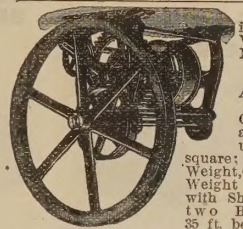
Price $140. F. O. B. St. Louis, Mo. Extra for each extra foot rise of car, 75c.
Price includes Winding Machine with Brake Arrangement. Car No. 12, any size up to 5 ft. square; Counter-Weight, Counter-Weight Sheave with Shaft and two Bearings; 35 ft. best Wire Cable, ½-in. diameter; 70 ft. Manilla Hand Rope, 1-in. diameter; 60 ft. Hardwood Guides; two Wire Rope Clamps; 70 ft. ⅝-in. Brake Line with two Sheaves; also Safety Attachment on Car.

No. 12. CAR WITH SAFETY ATTACHMENT.

This illustration shows style of Side Post Car used on all sizes of our Hand Elevators for freight service except No. 11. They are built of well-seasoned hardwood, strongly braced with bolts through timbers, either finished in natural wood or nicely painted. Usually made 6 ft. 3 in. high under beams. Can be built any size or shape to suit.

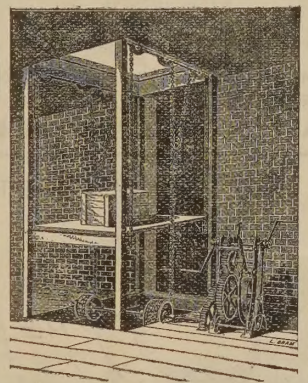
No. 3. CAPACITY 1,000 LBS.

Price $108.00. F. O. B. St. Louis, Mo.
Extra for each extra foot rise of Car, 60c.



Price includes Winding Machine with Brake Arrangement; Car No. 12 any size up to 4 ft. square; Counter-Weight, Counter-Weight Sheave with Shaft and two Bearings; 35 ft. best half-inch Wire Cable; 70 ft. Manilla Hand-Rope, 1 in. diam.; 60 ft. Hardwood Guides; two Wire-Rope Clamps; 70 ft. ⅝ in. Brake Line with two Sheaves; also Safety Attachment on Car.

Instead of the Automatic Clutch used on No. 1, our Elevators Nos. 3, 3½, 4, and 5 are provided with an Improved Brake operated by a ⅝ in. line running from top to bottom of Hatchway over two Sheaves. By pulling one of these Ropes the Brake is brought into action for lowering the load, and a stronger pull on the same Rope locks Brake and holds Car and full load perfectly solid. A moderate pull on the other Line releases the Brake and holds same open, so there is no friction on any of its parts.
The Brake is made adjustable so that all wear can be taken up.



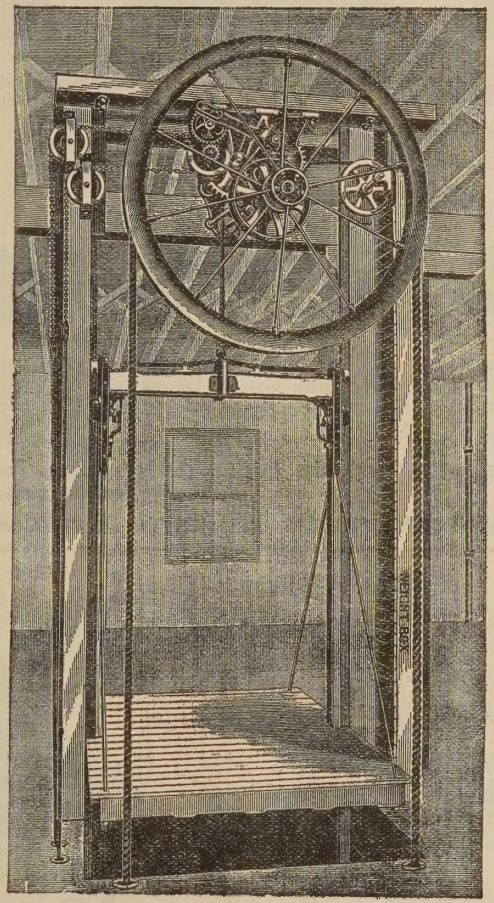
No. 14. IMPROVED FLOOR AND SIDEWALK HOIST.

Prices upon Application.

We furnish the entire outfit ready to set up, including Double Geared Winding Machine with Roller Bearings, Automatic Brake, two Cranks, Long Shaft with Winding Drums, four Steel Corner Posts, Wrought Iron Frame at top with six Sheaves, Cable Chains as required. We also furnish the same (if preferred) with two heavy Iron Posts instead of four at corners, as shown, with best Swedes Iron Hoisting Cables instead of Iron Chains.

No. 4. Capacity 2,000 lbs.
Price, $170.00 F. O. B. St. Louis, Mo.

Extra for each extra foot rise of Car, 75c.

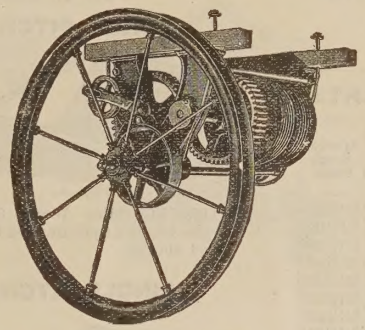


Price includes Winding Machine with Brake Arrangement; Car No. 12, any size up to 6 ft. square; Counter-Weight; Counter-Weight Sheave, with Shaft and two Boxes; 35 feet best ⅞-in. Wire Cable; 70 feet Manilla Hand-Rope, 1-in. diameter; 60 feet Hardwood Guides; 70 feet ⅝-in. Brake Line, with Sheaves; two Wire Rope Clamps; also Safety Attachment on Car.

SEND FOR DISCOUNTS.

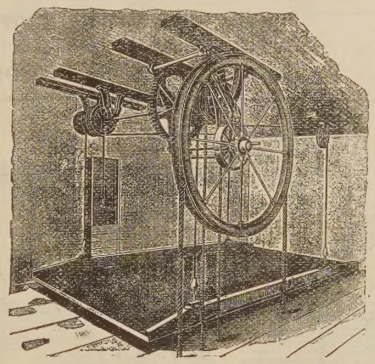
No. 5. CAPACITY 2,500 LBS.

Price $210.00 F. O. B. St. Louis, Mo.
Extra for each extra foot rise of Car, $1.00.



Price includes Winding Machine with Brake Arrangement, all extra heavy and double-geared. Car No. 12, any size up to 6 ft. square; Counter-Weight, two Counter-Weight Sheaves, two Shafts, two Bearings; two 9-16 inch Wire Cables, 35 ft. each; 70 ft. Manilla Hand Rope, 1¼ in. diam.; 60 ft. Hardwood Guides, bored and counter-sunk; 70 ft. Brake Line and two Sheaves; also Safety Attachment on Car.

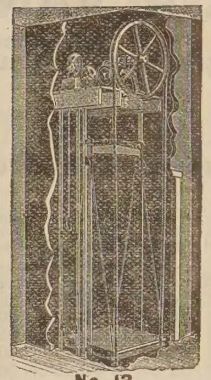
This machine has very heavy iron frame, complete, ready to be bolted to overhead timbers, and needs no other frame work. It is furnished with Steel Shaft of large size, running in Steel Roller Bearings. Drums spirally grooved to prevent cables from chafing. Double geared with pinions housed to points of teeth to give increased strength.



No. 11. Carriage or Wagon Elevator.

Prices on Application.

This cut shows our new Iron Frame Carriage Elevator erected ready for use. No posts or frame work are needed in its erection, as the frame bearings, sheaves and brackets are bolted to ceiling timbers, leaving all the space around hatchway clear. Two simple guide posts are used at back or on end of platform, running from lowest floor to top floor. Five fine wire cables are used, one for each corner of platform and one for the counter-weight. The winding drums are spirally grooved to prevent cable from wearing.

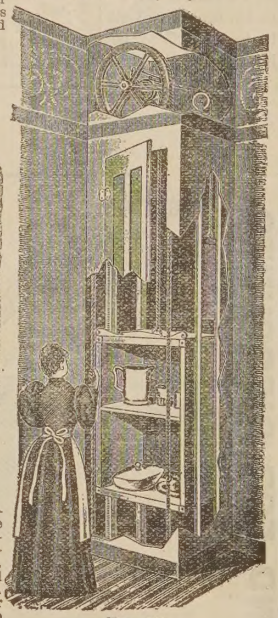


No. 13. CAPACITY 500 LBS.

Price $89.00. F. O. B. St. Louis, Mo.

Price includes Winding Machine; Car, any size to 3 ft. square; two Carrying Sheaves, two Cable Clamps, Counter-Weight, Hardwood Guides, Manilla Rope, Cable and Boxing.

The material and workmanship on these elevators are of the best. Each machine is set up and tested before leaving the factory, and guaranteed in every way.



No. 15. Automatic Dumbwaiter.

Prices upon Application.

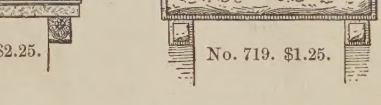
Window Sills.
No. 722. $1.10.

No. 723. $1.95.



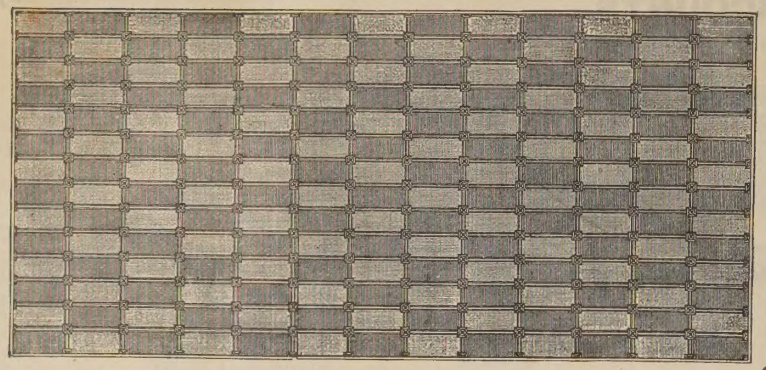
No. 724. $1.35.

The above prices for window and door caps are for openings from 30 to 40 inches in width between brick work. Other sizes will be charged extra. The square head window and door caps illustrated above can be changed to segment head caps at an expense of 75 cents additional each.

DIRECTIONS FOR ORDERING WINDOW AND DOOR CAPS.

Orders should specify if caps are wanted for square, segment or circular head openings. For segment or circular head openings give radius. Always state width of opening between brick work in inches, and give the distance that the frame is recessed from face of wall. State if caps are to be built in brick work, or put on building already erected, as a difference in construction of cap is necessary.

MESKER & BROS.' PAT. PANELED SHEET STEEL CEILINGS.



No. 725. Price per square, $8.60, F. O. B. cars St. Louis.

Permanent, Durable, Fire-Proof and Ornamental. Will not stain, crack nor fall off like plaster, nor shrink nor burn like wood Can be put on over old plastered ceilings or over wood ceilings without the necessity of moving either, saving thereby a great deal of time and expense, and avoiding considerable annoyance from dirt and dust.

No. 726. Price per square, $7.40, F. O. B. cars St. Louis.
